INDEX

CHAPTER 1

Introduction to the Internship

During my internship at Duma Infoservices Pvt Ltd, from May 20, 2024, to June 9, 2024, I had the opportunity to immerse myself in a comprehensive learning experience, where I acquired and honed my skills in several key web development technologies. Initially, I focused on mastering graphic designing technologies such as Figma , Canva, Adobe Photoshop and many more. These tools became the foundation for my work as I contributed to the development of a full- fledged web development.

During my internship, I not only focused on backend development but also actively contributed to the frontend. My proficiency in HTML and Tailwind CSS enabled me to design and implement a user-friendly interface that was both responsive and visually appealing. This experience allowed me to bridge the gap between theoretical knowledge and practical application, honing my problem-solving skills and solidifying my passion for full-stack development. I am eager to apply my newfound expertise in both graphic design and web development to future projects and contribute to innovative solutions in the tech industry.

This internship was a pivotal moment in my development as a software engineer. It allowed me to apply theoretical knowledge to real-world challenges, sharpen my problem-solving abilities, and gain confidence in delivering practical, effective solutions. The experience solidified my passion for full-stack development and prepared me for future endeavors in the tech industry
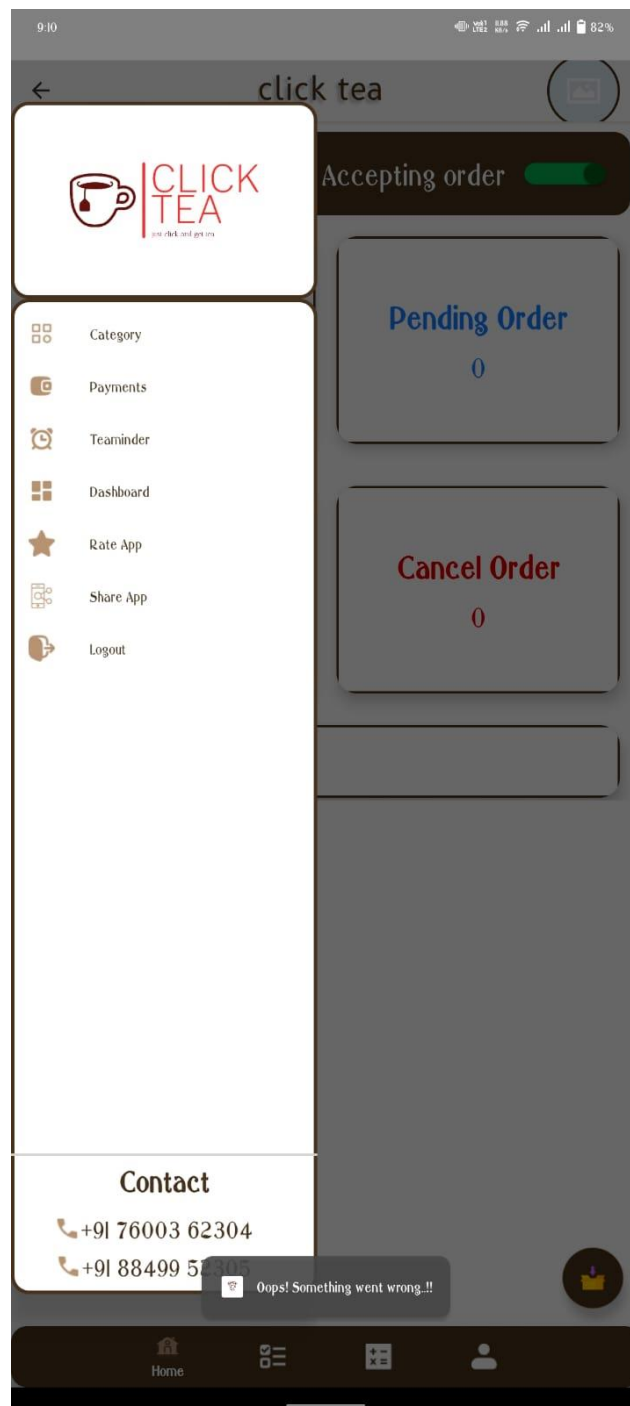

CHAPTER 2

Key Learning Achievements

---

1. Designing

2. Typography

3. Layout

4. Hierarchy

5. Balance

6. Authentication

7. Development

8. Implementation with APIs

9. Efficiency

10. Integration
